TRESU F10 iCon Intelligent ink control system

ink**Link**®

F10 iCon works with most press configurations

30% Production Increase.

With inkLink the users will experience a production increase of up to 30%, uniform quality and reduced consumption of resources.

The solution takes paramters such as flow, pressure, pH, temperature and viscosity into consideration.

F10 iCon Each ink circulator unit contains pumps for forward and return flow.

Trolley Movable and adjustable trolleys for ink buckets.

Press configuration CI-press or other press configurations.

Ink hoses Ink hose/pipes for forward and return flow. For water- and solvent based inks.

Chamber doctor blade Accommodates most brands.

User interface F10 iCon

Clean the system in 5-10 minutes with complete ink change on all units

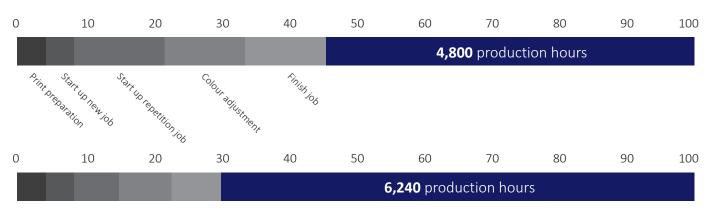

The F10 iCon enables fully automatic cleaning for water- and solvent-based inks with an easily adjustable menu.

The cleaning system removes ink, ensures the chamber is clear of residue and has low water/solvent consumption

Improvement of production time ROI in less than five months
